Preface

The purpose of this study is to document the economic significance of the travel industry in Wyoming. Detailed estimates of travel spending, the employment and earnings generated by this spending, and travel-generated tax receipts for each of Wyoming's twenty-three counties from 2000 to 2016 are shown in this report. Spending by domestic and international visitors and the secondary earnings and employment impacts of travel spending are provided at the state level. The estimates for 2016 are preliminary and subject to revision.

Dean Runyan Associates prepared this study for Wyoming Travel and Tourism. Dean Runyan Associates has specialized in research and planning services for the travel, tourism and recreation industry since 1984.

Many individuals and agencies provided information and advice for this report. Among the organizations involved in this effort were the Wyoming Department of Revenue, the Wyoming Department of Employment and the Wyoming Division of State Parks and Historic Sites. Federal agencies that provided assistance included the National Park Service, the Department of Labor and the Bureau of Economic Analysis.

Finally, special thanks are due to Diane Shober, Wyoming Office of Tourism Director. Without her support and assistance, this report would not have been possible.

I. INTRODUCTION

Visitors traveling to and throughout Wyoming represent an important component of the state's economy. Travel originating in domestic and international markets generates valuable business sales, payroll, employment and tax receipts for the state as well as for local jurisdictions. Further, many locations within Wyoming serve as travel destinations in their own right, for both Wyoming residents and out-of-state visitors. These areas accordingly consider travel and tourism a primary industry.

OBJECTIVES

This report describes the direct economic impacts of travel to and through the State of Wyoming and each of its 23 counties from 2000 through 2016. This report also includes statewide estimates of spending by resident and non-resident visitors and the secondary employment and earnings impacts associated with travel spending. A primary objective of this research is to provide reliable, detailed estimates, which allow comparisons from year-to-year for the state and county levels. A description of travel impacts estimates is included in Appendix A

TYPES OF TRAVEL IMPACTS INCLUDED

Most of the travel that occurs in Wyoming is included in the scope of this analysis. All trips to Wyoming by U.S. residents and international visitors are included. The travel of Wyoming residents to other destinations in Wyoming is included provided that it is neither commuting nor other routine travel. Travel to non-Wyoming destinations by Wyoming residents is not included.

The impacts associated with both overnight and day travel are included if the travelers either remain at the destination overnight or the destination was more than fifty miles *one-way* from the traveler's home. These definitions are used to screen and, if necessary, to interpret and adjust local data used for travel impact measurements. The most conservative interpretation is employed where data limitations cause deviations from the above definition.

The terms "traveler" and "visitor" are used interchangeably in this report. Both represent a person who is traveling in Wyoming away from his or her home, on a trip as defined above. The purpose of such travel can be for business, pleasure, shopping, to attend meetings, or for personal, medical or educational purposes.

This analysis focuses on travel and tourism as a component of local and statewide economies and therefore focuses on *destination-specific* impacts. Because air transportation facilities provide travel services that benefit businesses throughout the state, it is appropriate to include air transportation as a component of the travel industry.

However, while the impacts (e.g., employment) associated with air transportation do occur within specific geographic areas, primarily those counties with commercial airport facilities, it is important to recognize, due to the regional character of air travel, that the benefits also extend to those counties that do not provide air transportation.

REPORTING FORMAT

The format of the detailed impact tables was developed to provide meaningful industry estimates of earnings and employment and reflects the conversion to the NAICS system now used by the Bureau of Labor Statistics (BLS) to report payroll statistics and by the Bureau of Economic Analysis (BEA) to report earnings and total employment*. Prior to 2001, the 1997 Standard Industrial Classification (SIC) was the reporting scheme used by federal and state agencies.

The first three sections, *Visitor Spending by Type of Traveler Accommodation*, *Visitor Spending by Commodity Purchased* and, *Total Direct Travel Spending* describe classifications of visitor spending.

- *Visitor Spending by Type of Traveler Accommodation* refers to the total direct spending of each category of visitor at that destination (county or state). For example, the spending of visitors that stayed at hotels, motels, resorts, or B&B's includes their spending on accommodations, food & beverage service, recreation and all other visitor related commodities.
- *Visitor Spending by Commodity Purchased* refers to the total spending on each commodity for all types of visitors. For example, the total spending on Food & Beverage Services includes spending by visitors staying, in hotels, private campgrounds, private homes and the other types of accommodation. The total spending on commodities is identical to the total spending by type of accommodation.

* The NAICS industries that comprise travel impact industries are defined in Appendix C.

- *Total Direct Travel Spending* includes the total visitor spending at destination, described above, plus spending on air transportation. Total direct travel spending does not include secondary (indirect and induced) effects.

The next two sections, *Direct Travel-Generated Earnings by Industry* and *Direct Travel-Generated Employment by Industry*, provide estimates of travel-generated earnings and employment that are based on an industry, rather than a commodity, classification. A business that is classified in a particular industry may include more than one commodity. For example, a resort that is classified in the accommodation industry may provide accommodations, food and beverages, and recreation.

- *Direct Travel-Generated Earnings by Industry* includes the payroll, other earned benefits, and proprietor income of all employees in that industry classification.
- *Direct Travel-Generated Employment by Industry* includes all full- and part-time employees. This includes payroll employees covered by unemployment insurance and those that are not, as well as proprietors.

The final section, *Tax Revenues Generated by Travel Spending*, is identical to last year's report. Local taxes include room taxes, local sales taxes, and the local share of state taxes. State taxes include the state share of the sales tax and the state motor fuel tax.

REPORT CONTENTS

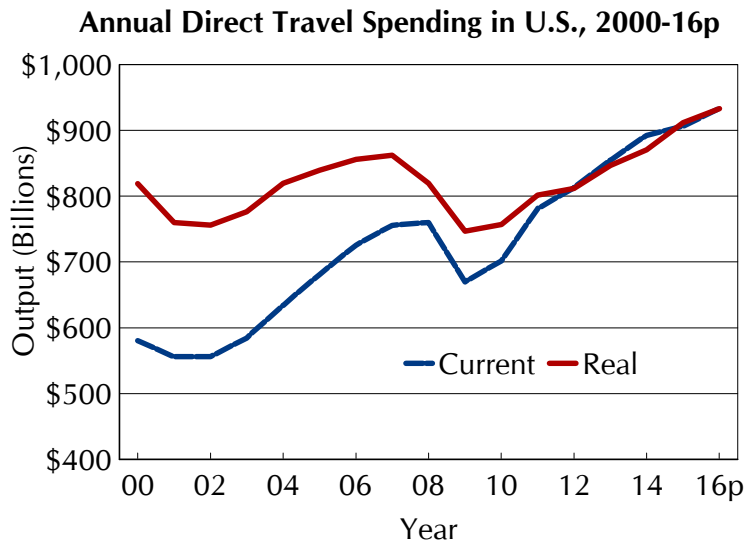

Section II provide an overview of U.S. Travel trends. Section III provides an overview of Travel Impacts in the state, as well as detailed estimates for 2000 through 2016. Section IV provides summary and detailed tables for each of Wyoming's twenty-three counties. A description of the methodology is included in Appendix A. Definitions of the travel terms used in this report can be found in Appendix B. Appendix C provides a listing of the relevant business classifications (NAICS codes) used to represent travel industry businesses. The method for deriving secondary impacts is discussed in greater detail in Appendix D. Appendix E provides a detailed listing of the industries used in the secondary impact analysis.

II. U.S. Travel

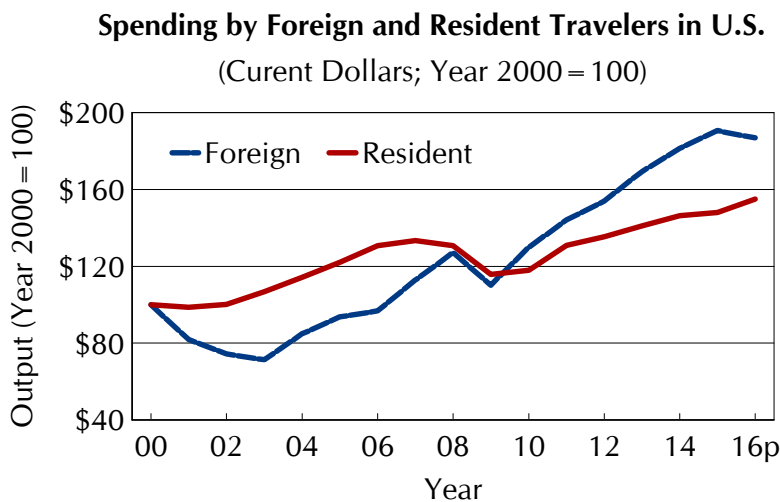

The national level data in this section focuses on visitor spending trends in current and real dollars, resident and foreign visitor spending in the U.S., and trends in travel-generated employment.

The following two graphs are derived from the Bureau of Economic Analysis Travel and Tourism Satellite Accounts*. Both graphs show direct tourism output for the United States - spending by resident and foreign visitors. The 2016 values are preliminary.

Spending by resident and foreign visitors was \$933 billion in 2016 in current dollars. This reflects 3 percent increase over 2015. When adjusted for changes in prices (real dollars), spending increased by 2.3 percent from 2015 to 2016 - compared to a 4.7 for the preceding year.

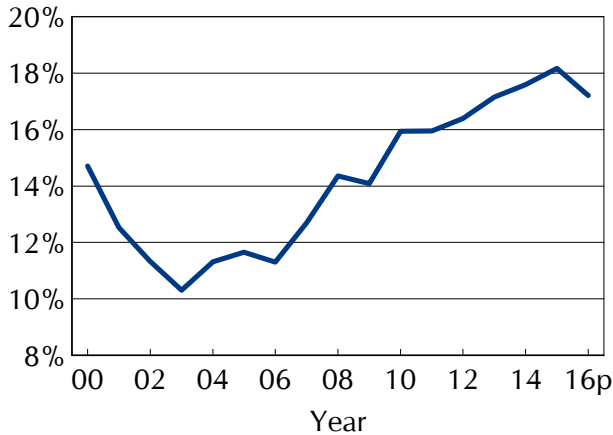

The bottom chart compares the change in current dollar spending by resident and foreign visitors since 2000. In 2016, the increase in spending by resident visitors (4.7 percent) exceeded the increase in foreign visitor spending (-2.0 percent). This is the first year since 2009 when resident spending growth was greater than foreign.

Note: Foreign visitor spending does not include expenditures on health and educational services or expenditures by short term seasonal workers.

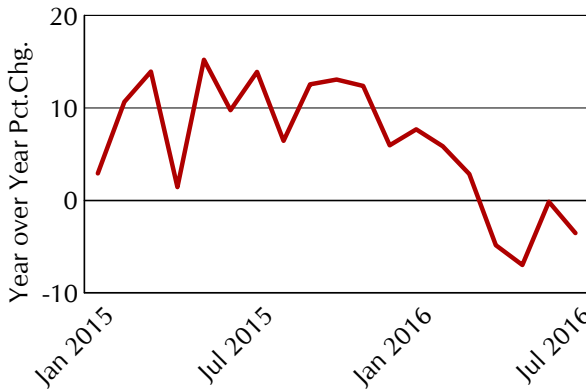

*See <http://www.bea.gov/industry/index.htm#satellite>.

Foreign Share of U.S. Internal Travel Spending

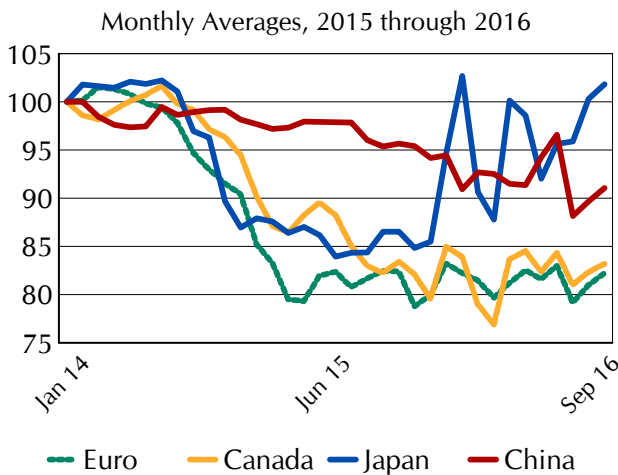

The foreign share of U.S. internal travel declined by almost a full percent point from 2015 to 2016 (18.2 percent to 17.2 percent). This has been due to two factors. First, overseas arrivals began to show a decreasing rate of growth in the beginning of 2016 and actually declined in absolute numbers in the most recently reported months.

Overseas Arrivals (Year over Year Percent Change)

Secondly, the value of foreign currencies has fallen relative to the U.S. dollar. This not only discourages travel to the U.S., but also means that foreigners that do travel to the U.S. have less money to spend on goods and services.

Relative Value of Selected Foreign Currencies compared to U.S. Dollar

Sources:

Foreign Share of U.S Internal Travel: Bureau of Economic Analysis Travel & Tourism Satellite Accounts and International Transactions.

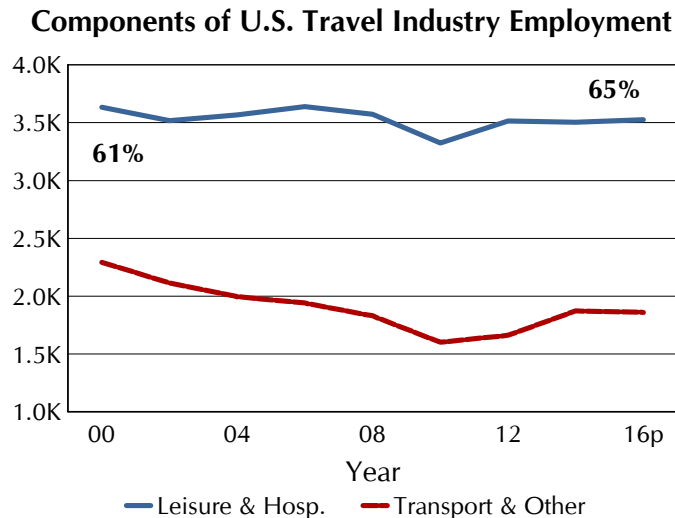

Overseas Arrivals: Office of Travel and Tourism Industries, U.S. Department of Commerce. Note: Arrivals for 2014 and 2015 are somewhat greater than preceding years due to a change in processing methodology.

Relative Value of Selected Foreign Currencies: USForex, Inc. (www.usforex.com)

The following two graphs show employment trends since 2000. The first graph shows that travel-generated employment has increased at a steady rate since 2010. Travel industry employment has now recovered to the level immediately preceding the 2008-09 recession, although it is still below its peak earlier in that decade. Part of the reason for this is shown in the second graph. Leisure and hospitality employment was 3.5 million in 2016 or 65 percent of total travel industry employment, compared to 3.6 million in 2000 or 61 percent of the total. Most of this growth was due to food services employment. However, employment in transportation and other industries declined over the same period from 2.3 million to 1.8 million, mostly due to decreased employment in the airline and related transportation industries.

Source: Bureau of Economic Analysis Travel & Tourism Satellite Accounts.

Source: Bureau of Economic Analysis Travel & Tourism Satellite Accounts. Leisure & hospitality includes accommodations, food services, and arts, entertainment & recreation. Transportation and other includes retail and all other industries.

III. Wyoming Travel Impacts 2000 - 2016

The travel industry is an important sector of the Wyoming economy. In some areas of the state, it is one of the major industries. This section provides an overview of travel in the state from 2000 through 2016. Detailed travel impacts are provided in the table that concludes this section.

STATE SUMMARY: DIRECT IMPACTS OF TRAVEL IN WYOMING

- Travel spending by all domestic and international visitors in Wyoming was approximately \$3.2 billion in 2016. This is equivalent to approximately \$8.9 million dollars per day.
- Overall, travel spending in Wyoming has increased 4.3 percent per year since 2000. In constant dollars (adjusted for inflation), travel spending has increased by about 2.7 percent per year over the same period.
- Visitors who stayed overnight in commercial lodging facilities spent \$1.8 billion in 2016 - more than half (58%) of all visitor spending in the state. Visitors who stayed in public and private campgrounds spent \$563 million, or about 18 percent of all visitor spending.
- During 2016, travel spending in Wyoming directly supported approximately 32,000 jobs with travel-generated earnings of \$894 million. Travel spending generated the greatest number of jobs in accommodations, recreation, and food service industries.
- Local and state tax revenues generated by travel spending were about \$171 million in 2016 (property taxes not included). Without these travel generated tax revenues, each household in Wyoming would have had to pay an additional \$730 in taxes per year to maintain these current state and local tax revenues.

The following table and charts document these travel impacts. Detailed travel impact estimates for the state from 2008 to 2016 are found on page 17.

Wyoming Direct Travel Impacts, 2000 - 2016

	Travel Spending		Earnings (\$Million)	Employment (Jobs)	Local & State Tax Receipts		
	Total (\$Million)	*Non-transp (\$Million)			Local (\$Million)	State (\$Million)	Total (\$Million)

2016	3,240	2,587	894	31,770	71	100	171
<i>Annual Percentage Change</i>							
15-16	-1.6%	0.6%	2.9%	-0.2%	1.1%	-1.2%	-0.3%
00-16	4.3%	3.9%	4.7%	1.1%	6.0%	5.8%	5.9%

Note: Details may not add to totals due to rounding.

*Non-transportation travel spending does not include motor fuel purchases and air travel.

Earnings include wages & salaries, earned benefits and proprietor income.

Employment includes all full- and part-time employment of payroll employees and proprietors.

Local tax revenue includes lodging and sales taxes paid by visitors.

State tax revenue includes sales and motor fuel tax payments of visitors.

Federal tax revenue includes motor fuel excise taxes and airline ticket taxes, and the payroll and income taxes attributable to the travel industry income of employees and businesses.

Detailed Wyoming Direct Travel Impacts, 2000 - 2016

IMPACT OF MOTOR FUEL PRICES ON THE WYOMING TRAVEL INDUSTRY

In 2016, Wyoming Travel Spending declined -1.6% over 2015. This was driven by lower motor fuel prices within the transportation segment (motor fuel and visitor air travel) equal to \$613 million of travel spending in 2016 vs. \$683 million in 2015 (shown below). These declines are primarily tied to the price of oil per barrel vs. the sales volume of visitor-related motor fuel (consumption).

Non-transportation travel spending (shown below) grew by 0.6 percent over 2015.

Wyoming Travel Spending by Commodity Purchased

VISITORS IMPACTS TO WYOMING BY VISITOR RESIDENCE

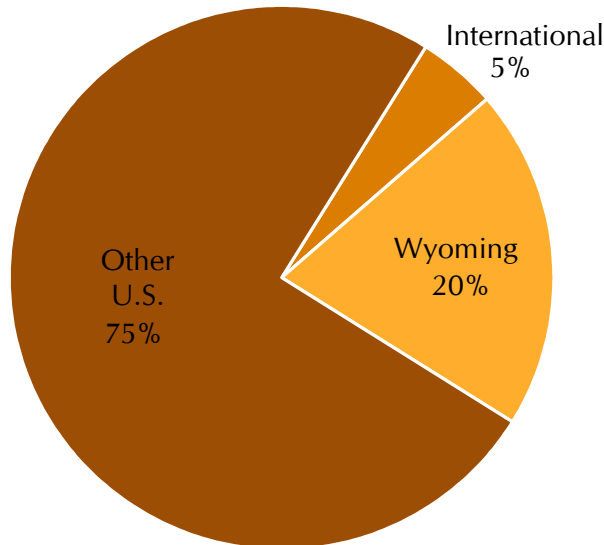

U.S. residents of states other than Wyoming accounted for approximately three-quarters of all travel spending in Wyoming in 2016. Residents of Wyoming accounted for 20 percent, while international visitors accounted for about 5 percent of travel spending in the state. Detailed estimates by visitor residence are reported in the following table for spending, earnings, employment, and tax receipts (local, state, and federal).

Travel Impacts by Visitor Residence, 2016

	Wyoming	Other U.S.	International	All Visitors
Spending (\$Million)	655	2,430	154	3,240
Earnings (\$Million)	171	677	46	894
Employment (Jobs)	6,200	23,970	1,590	31,770
Local Taxes (\$Million)	13	53	4	71
State Taxes (\$Million)	21	74	4	100
Federal Taxes (\$Million)	25	103	6	135
Total Taxes (\$Million)	60	231	15	306

Details may not add to totals due to rounding.

Travel Spending by Visitor Residence, 2016

International visitor impacts for Wyoming were derived from the U.S. International Transactions by area of origin estimates prepared by the Bureau of Economic Analysis (BEA) and the origin and destination profiles of international visitors reported by the International Trade Administration (ITA)*. The related employment and tax impacts of international visitors to Wyoming were derived from the travel impact estimates prepared by Dean Runyan Associates.

*Both BEA and ITA are agencies of the U.S. Department of Commerce.

SECONDARY IMPACTS

Travel spending within Wyoming brings money into many Wyoming communities in the form of business receipts. Portions of these receipts are spent within the state for labor and supplies. Employees, in turn, spend a portion of their earnings on goods and services in the state. This re-spending of travel-related revenues creates *indirect and induced impacts*. To summarize:

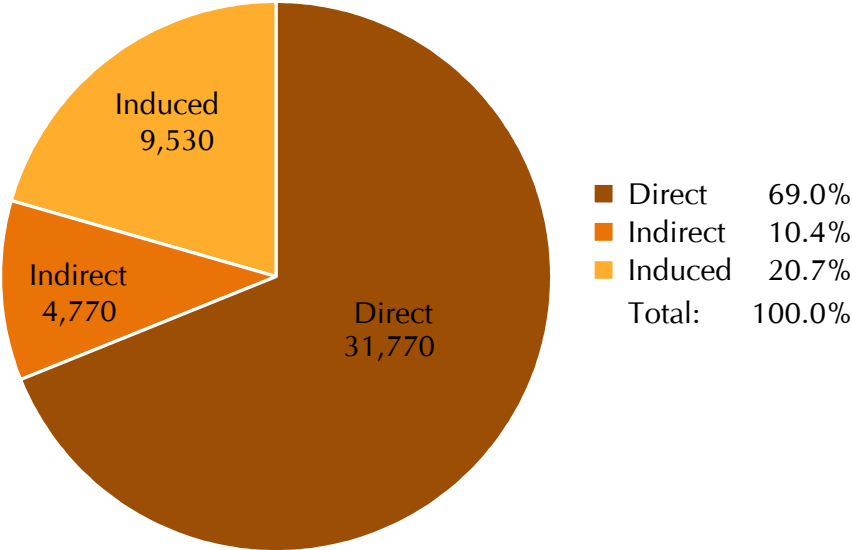

- **Direct** impacts represent the employment and earnings attributable to travel expenditures made directly by travelers at businesses throughout the state.
- **Indirect** impacts represent the employment and earnings associated with industries that supply goods and services to the direct businesses (i.e., those that receive money directly from travelers throughout the state).
- **Induced** impacts represent the employment and earnings that result from purchases for food, housing, transportation, recreation, and other goods and services made by travel industry employees, and the employees of the indirectly affected industries.

The impacts in this section are presented in terms of the employment and earnings of eleven major industry groups. These industry groups are similar, but not identical to the business service (or commodity) categories presented elsewhere in this report. (The specific industries that comprise these groups are listed in Appendix E.) Direct travel impacts, such as those discussed in the first part of this section and the county impacts presented elsewhere in this report are found in the following industry groups:

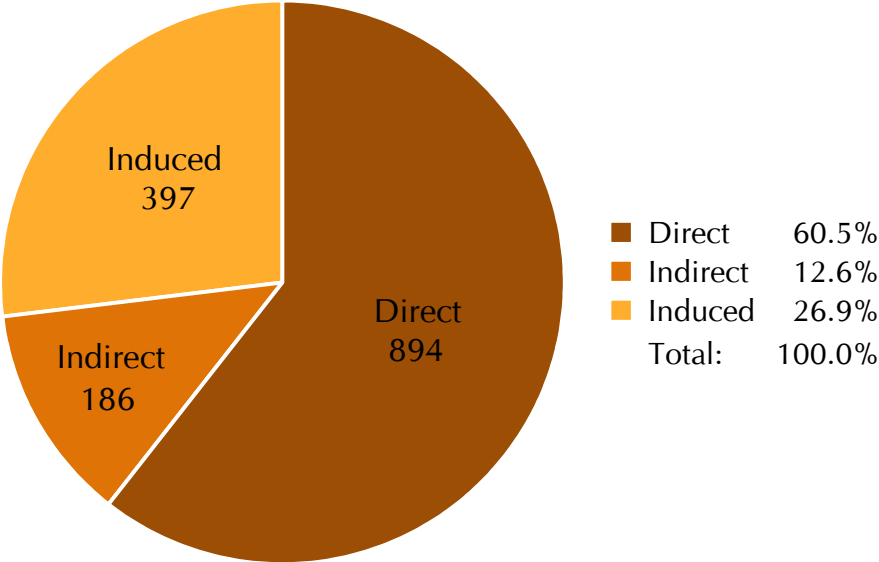

- **Accommodation & Food Services**
- **Arts, Entertainment, and Recreation**
- **Retail Trade**
- **Transportation**

Total Employment and Earnings Generated by Visitor Spending in Wyoming, 2016

Employment (Jobs)

Earnings (\$Million)

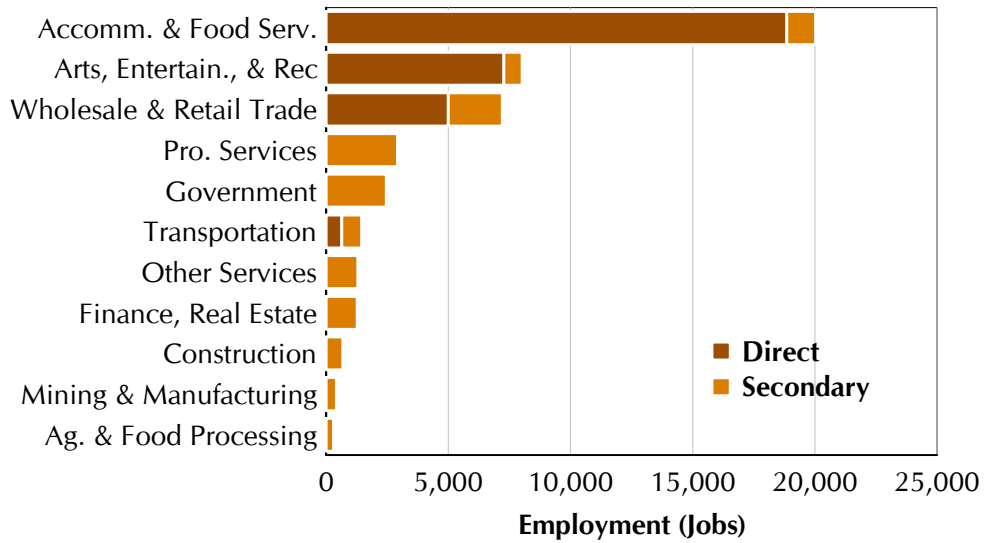

The indirect and induced impacts of travel spending are found in all eleven-industry groupings shown in the following tables and graphs. The remainder of this section summarizes the secondary impacts of travel spending in the primary industry groups.

- **Professional Services** (2,922 jobs and \$134 million earnings). Legal, medical, educational and other professional services are utilized by travel businesses (indirect effect) and by employees of these firms (induced effect).
- **Other Services** (1,291 jobs and \$38 million earnings). Employees of travel-related businesses purchase services from various providers, such as dry cleaners and repair shops. Similarly, travel businesses utilize a number of service providers, such as laundry, maintenance, and business services.
- **Government** (2,464 jobs and \$132 million earnings). Employees of travel-related businesses pay taxes and fees to attend public educational institutions and to operate motor vehicles.
- **Wholesale and Retail Trade** (2,223 jobs and \$81 million earnings). Employees of travel-related businesses spend a portion of their earnings on food, clothing, and other household goods from local businesses.
- **Finance, Insurance, & Real Estate** (1,266 jobs and \$33 million earnings). Employees and businesses use the services of financial institutions, insurers, and real estate businesses.

Detailed estimates are reported in the following graphs and tables. It should be emphasized that the estimates of indirect and induced impacts reported here apply to the entire state of Wyoming and do not necessarily reflect economic patterns for individual counties, regions or sub-regions within the state. While total economic impacts can be calculated on a county or regional level, such a detailed analysis is not included in this study. In general, geographic areas with lower levels of aggregate economic activity will have smaller secondary impacts within those same geographic boundaries.

IV. County Travel Impacts 2000 - 2016

This section provides detailed county estimates, as well as a number of summary tables, for the years 2000 to 2016. In interpreting these estimates, readers are advised that:

- All monetary values are expressed in *current* dollars (no inflation adjustment).
- The estimates measure direct impacts only. Secondary impacts are reported at the state level for employment and earnings.
- In general, estimates of counties with small populations and economies are less reliable than estimates for more populous and economically diverse areas. Trend analysis and comparisons of counties with relatively low levels of travel related economic activity should therefore be interpreted cautiously.

In addition to the detailed county estimates, two indicators of the relative importance of visitor spending in counties are provided. The first is a comparison of travel-generated employment with total employment. The estimates of total employment are taken from the Bureau of Economic Analysis, U.S. Department of Commerce and Bureau of Labor Statistics, U.S. Department of Labor (these estimates are for 2015). The second indicator is a comparison of estimates of travel-generated state tax receipts with state sales tax distributions for 2016.

It is important to emphasize that these indicators should be interpreted with care. Estimates for areas with low levels of economic activity are generally less reliable than estimates for larger local economies. This is even more the case for the indicators provided in this section. The employment figures provided by the Bureau of Economic Analysis are themselves estimates. It should also be noted that these estimates measure the total number of jobs (including self-employment) in an area, not the number of residents that work.

The sales tax distribution totals figures provided by the Wyoming Department of Revenue will be influenced by the particular business make-up of the locale. As with travel-oriented businesses, some of the sales of these businesses may originate with purchases of residents of other counties. For these and other reasons, the measures provided in this section are general indicators that should be used in conjunction with other measures of local economic activity.

Travel spending less transportation does not include gasoline purchases and air travel. Total Earnings includes wage and salary disbursements, other earned income and proprietor income. Employment includes payroll employees and proprietors. Tax receipts include local option lodging and sales taxes, state sales tax and the gasoline tax. State sales taxes are allocated to local government (31 percent) and the state (69 percent). Property taxes are not included.

TRAVEL IMPACT ESTIMATES

This appendix provides a brief overview of the methodology and limitations of the travel impact estimates.

DIRECT IMPACTS

The estimates of the direct impacts associated with traveler spending in Wyoming were produced using the Regional Travel Impact Model (RTIM) developed by Dean Runyan Associates. The input data used to detail the economic impacts of the Wyoming travel industry were gathered from various local, state and federal sources.

Travel impacts consist of estimates of travel spending and the employment, earnings, and state and local taxes generated by this spending. These estimates are also broken out by type of traveler accommodation and by the type of business in which the expenditures occur.

SECONDARY (INDIRECT AND INDUCED) IMPACTS

Direct impacts are reported for all counties within Wyoming. Secondary employment and earnings impacts over and above direct impacts are reported at the state level only for the year 2015. These indirect and induced impacts are generated from the direct impacts produced by the RTIM, discussed above, and an input-output model of the Wyoming economy prepared by IMPLAN Group, LLC.

Indirect impacts represent the purchases of goods and services from other firms by businesses that directly receive expenditures from travelers. Hotels, for example, purchase maintenance services from independent contractors.

Induced impacts represent the purchase of goods and services by employees whose earnings are in part derived from travel expenditures. The sum of the direct, indirect and induced impacts equals the total impact of all spending by visitors in the state. The “multiplier” refers to the ratio of the total impacts to the direct impacts for employment or earnings.

IMPACT CATEGORIES

The specific categories of travel impacts included in this analysis are as follows:

Impact Category	Description
Expenditures	Purchases by travelers during their trip, including lodging taxes and other applicable local and state taxes paid by the traveler at the point of sale.
Total Earnings	The wage and salary disbursements, earned benefits of employees and proprietor income of business owners who work in travel-related businesses. Only the earnings that are attributed to travel expenditures are included.
Employment	All employment associated with the above earnings. This includes wage and salary workers and proprietors, and full- and part-time positions. The employment estimates are not full time equivalents (FTE's).
Local Tax Receipts	Tax receipts collected by counties and municipalities, as levied on applicable travel-related purchases. Consists of local option lodging taxes, local sales taxes and other local use taxes. The local share (31 percent) of state sales taxes are included. Property taxes are not included.
State Tax Receipts	State sales taxes (including tax receipts distributed to local governments) and gasoline taxes attributable to travel expenditures. Only the state share (69 percent) of state sales taxes are included.

VISITOR CATEGORIES

Travelers are classified according to the type of accommodation in which they stay. The types of accommodations are as follows:

Type of Accommodation	Description
Hotel, Motel, Resort, B&B	Travelers staying in hotels, motels, resorts, guest ranches, bed & breakfast establishments, and other commercial accommodations where sales or lodging taxes are collected.
Private Campground	Travelers staying in a privately owned (i.e., commercial) campground.
Public Campground	Travelers staying in publicly managed campgrounds such as those managed by the Wyoming Division of State Parks and Historic Sites or the National Park Service.
Private Home	Travelers staying as guests with friends or relatives.
Vacation Home	Travelers using their own vacation home or timeshare and those borrowing or renting a vacation home where sales or lodging taxes are not collected.
Day Visitor	Both in-state and out-of-state residents whose trip (at least 50 miles one way) does not include an overnight stay at a

INTERPRETATION OF IMPACTS ESTIMATES

Users of this report should be aware of several issues regarding the interpretation of the impact estimates contained herein:

- The estimates in this report are expressed in *current* dollars unless otherwise noted.
- When comparing the impact estimates associated with different locations or different time periods, it is more appropriate to focus on *destination spending* (which excludes air transportation) rather than total travel spending.
- In general, estimates of geographic units with small populations and economic activity (e.g., rural counties) are less reliable than estimates for more populous and economically diverse areas. Trend analysis and comparisons of counties with relatively low levels of travel related economic activity should therefore be interpreted cautiously.

RELATED TRAVEL IMPACTS

Hotel, Motel, Resort, B & B.

Spending on commercial accommodations is estimated from applicable local lodging tax receipts and state sales tax receipts. Spending by hotel, motel and resort guests in other business categories, such as food and transportation, is estimated using spending distributions reported in the visitor survey data. The spending distribution shows how travelers divide their spending between lodging and other purchases.

Private Campground. Spending by campers using commercial campgrounds is estimated from the number of commercial campsites, the average occupancy of these campsites, and the average daily expenditures of visitor camp parties reported in survey data. Spending in other business categories is estimated in the same way as for hotel guests.

Public Campground. Spending by campers using public campgrounds is estimated from visitor counts at national and state parks and recreation areas, and daily spending estimates from the visitor survey.

Private Home. Spending by private home guests is determined from visitor survey data estimating the number of visitors staying as guests of friends and relatives and applying these rates to the household population base in individual counties.

Vacation Home. Estimated spending by vacation home renters and owners (where no lodging or sales tax is collected) is based on the inventory of vacation homes (2010 U.S. Census) expenditure survey data of vacation home visitors that made trips of 30 days or less.

Note: The visitor survey data referenced above was provided Longwoods International.

Air Transportation. Visitor spending estimates for air transportation are derived from the Origin-Destination survey conducted for the Bureau of Transportation Statistics. Employment and earnings estimates are derived from industry receipts, payroll, and employment data for passenger traffic. The impacts of air cargo operations on scheduled passenger flights are not included in these estimates.

Earnings generated directly from traveler expenditures is estimated from the payroll-to-receipts ratios derived from the 2012 Economic Census and earnings data provided by the Bureau of Economic Analysis (U.S. Department of Commerce).

Employment in each business category is calculated from wage data provided by the Wyoming Department of Labor and Employment and earnings data provided by the Bureau of Economic Analysis.

DEFINITION OF TERMS

ECONOMIC IMPACTS

Accommodation: Spending for lodging by hotel and motel guests, campers and vacation home users.

Air Transportation: Air passenger spending attributable to travelers in and to Wyoming. The spending total includes air travel spending made outside Wyoming for travel to Wyoming as a final destination, purchases by Wyoming residents who travel outside the state, and air travel within the state.

Campers: Travelers staying at RV parks and commercial campgrounds or at public campgrounds such as those in state and national parks.

Destination Spending: Spending by travelers at or near their destinations. This excludes spending on air transportation and travel agent commissions. All automobile operating expenses are included in the ground transportation component of destination spending.

Earnings: Total earnings include wage and salary disbursements, other earned income, and proprietor income. Only the earnings attributable to travel expenditures are included.

Food and Beverage Services: Businesses serving food and beverages for immediate consumption. In addition to table service restaurants, this category includes fast-food outlets and refreshment stands.

Employment: Industry employment (jobs) associated with the travel-generated payroll and proprietors. This includes both full- and part-time positions.

Expenditures: Purchases by travelers during their trip, including lodging taxes and other applicable local and state taxes paid by the traveler at the point of sale.

Food Stores: Grocery stores, supermarkets, fruit stands, retail bakeries, and other businesses selling food for consumption off the premises.

Ground Transport: Spending on car rentals, gasoline and other vehicle operating expenses and on local transportation such as taxi, bus and train.

Hotel, Motel, Resort Guests: Travelers staying in hotels, motels, guest ranches, resorts, bed & breakfast establishments, condominiums and other lodging places where a lodging or sales tax is collected.

Local Tax Receipts: Tax revenue collected by counties and municipalities, as levied on applicable travel-related businesses. Consists of hotel occupancy taxes and other local use taxes (e.g., automobile rentals).

Lodging Tax: A local tax charged on lodging. Also referred to as room tax, transient lodging tax, or bed tax.

Private Home Guests: Travelers staying as guests with friends or relatives.

Receipts: Travel expenditures less the sales and excise taxes imposed on those expenditures. Also referred to as business receipts.

Recreation: Spending on entertainment and recreation, such as admissions to tourist attractions or artistic events.

Retail Sales: Spending for gifts, souvenirs and other items. Excludes spending listed separately, such as food stores or recreation.

Spending Distributions: Information from visitor surveys showing how spending by each type of visitor is divided among various business categories.

State Tax Receipts: State sales taxes, motor fuel taxes, and income taxes on visitor generated earnings and business income.

Travel: An overnight trip that is not of a local or commuting nature. Travel may be for business or pleasure purposes.

Traveler: A person traveling in Wyoming. A traveler may be a Wyoming resident or a resident of another state. The terms traveler and visitor have the same meaning in this report.

Vacation Home User: Travelers using their own vacation home or timeshare and those renting a vacation home or privately owned cabin where a lodging or sales tax is not collected. Vacation home users are limited to stays of thirty days.

VISITOR VOLUME

Length of Stay: The number of nights that a visitor or travel party is away from home on a trip.

Night: Applies to overnight visitors only. The number of nights on a trip is the length of stay. The count of days and nights is generally equivalent for overnight visitors. (See trips.)

Party-trips: The number of trips to the destination by travel parties. Party-trips are equal to the number of Visitor-trips divided by the average party size.

Party-nights: The number of nights or days that travel parties stayed at the destination. Party-nights are equal to the number of visitor-nights divided by the average party size or the number of party-trips multiplied by the average length of stay.

Party Size: The number of individuals (adults and children, including non-household members) that are traveling together and are sharing the costs of travel.

Room Demand: A count of the number of hotel/motel rooms that are sold on a nightly basis over a given period of time. Also referred to as *room nights sold*.

Travel party: A *travel party* includes all *visitors* (adults and children) traveling together. The *party size* represents the average number of visitors or persons in the travel party.

Trip: A trip may include more than one day or night at a destination. For overnight visitor categories, the total number of trips will be less than the number of nights. The *length of stay* for the trip represents the number of nights (or days) at the destination.

Visitor: An individual traveler that stays overnight away from home in paid or unpaid accommodations, or a day visitor that travels at least fifty miles one-way from home on non-routine trip.

Visitor Air Arrival: A passenger who travels by air and initiated the trip at another location. Visitor air arrivals do not include passengers who are returning home from a trip to another destination or passengers that are making a connection to another flight.

Visitor-trips: The number of trips to the destination by visitors or persons. This is also equivalent to as the total number of *visits*.

Visitor-nights: The number of nights or days that visitors (persons) stayed at the destination. Visitor-nights are equal to the number of visitor-trips multiplied by the average length of stay.

Relationship between Spending and Volume

The Spending, Average Expenditures and Volume tables are computationally related as shown below.

- **Spending equals Average Expenditures multiplied by Volume** for comparable party/person and night/trip categories
- **Travel parties and persons** are related by division or multiplication with **Party Size**
- **Trips and nights** are related by division or multiplication with **Length of Stay**

Visitor Spending by Type of Accommodation (\$Million), YEAR

		YE
All Overnight	$656,000 \times \$86 = \$56,100,000$ (calculated from person-trips)	5
Hotel, Motel	$160,000 \times \$200 = \$32,000,000$ (calculated from party-nights)	3
Private Home	$1,030,000 \times \$20 = \$20,600,000$ (calculated from person-nights)	2
Other Overnight	$10,000 \times \$350 = \$3,500,000$ (calculated from party-trips)

TRAVEL IMPACT INDUSTRIES MATCHED TO 1997 NAICS

TRAVEL IMPACT INDUSTRY	NAICS INDUSTRIES* (code)
Accommodation & Food Services	Accommodation (721) Food Services and Drinking Places (722) Residential Property Managers (531311)
Arts, Entertainment & Recreation	Performing Arts, Spectator Sports (711) Museums (712) Amusement, Gambling (713) Scenic and Sightseeing Transportation (487) Miscellaneous Industries (see note* *)
Retail	Food & Beverage Stores (445) Gasoline Stations (447) Clothing and Clothing Accessories Stores (448) Sporting Goods, Hobby, Book, and Music Stores (451) General Merchandise Stores (452) Miscellaneous Store Retailers (453)
Ground Transportation	Interurban and rural bus transportation (4852) Taxi and Limousine Service (4853) Charter Bus Industry (4855) Passenger Car Rental (532111) Parking Lots and Garages (812930)
Air Transportation	Scheduled Air Passenger Transportation (481111) Support Activities for Air Transportation (4881)
Travel Arrangement Services	Travel Arrangement and Reservation Services (5615)

Notes: *Government enterprises (e.g., park systems) are included in this classification.
 ** Includes parts of industries in other sectors (e.g., accommodation, charter bus).
 A more detailed description of these industries can be found at <http://www.ntis.gov/naics>.

IMPLAN MODELING SYSTEM ¹

IMPLAN is a widely used, nationally recognized economic impact model, first developed by the U.S. Forest Service. IMPLAN provides estimates of the additional economic activity associated with a sale of a good or service to a traveler. This methodology has been packaged, along with the necessary data files, as IMPLAN Pro by the Minnesota IMPLAN Group, Inc. (MIG) of Stillwater, Minnesota, and is the basis for the analysis in this report. Some of the conventions used by IMPLAN follow.

DATABASE COMPONENTS

The IMPLAN databases consist of two major parts: 1) national-level matrices and tables and 2) economic and physical data at the county and/or state level. The national matrices are combined with regional data to create a regional model which can be edited to reflect local conditions.

The IMPLAN data is divided into four main categories:

1. Industry Output
2. Employment
3. Value Added (includes employee compensation)
4. Final Demands

Industry output represents the dollar value of an industry's total production. The data is derived from a number of sources including Bureau of Census economic censuses and the BLS employment projections.

Employment is listed as a single number of jobs for each industry. The data is derived from ES202 employment security data supplemented by county business patterns and Regional Economic Information System (REIS) data. All IMPLAN databases (after 1985) include both full-time and part-time workers in employment estimates.

Value Added includes employee compensation, proprietor income, other property type income, and indirect business taxes. Employee compensation includes the total payroll costs (including benefits) of each industry in the region. Proprietary income consists of payments received by self-employed individuals (includes private business owners, doctors, and lawyers). Other property type income consists of payments from rents, royalties, dividends, and interest. Indirect business taxes consist primarily of excise and sales taxes paid by individuals to businesses.

¹Minnesota IMPLAN Group, Inc., "Micro IMPLAN Users Guide", version 91-F, March 1994.

Final Demands are the dollar value of goods and services purchased by consumers and institutions (federal, state, and local government). Personal consumption expenditures are the largest component of final demand. It consists of payments by individuals/households to industries for goods and services used for personal consumption. IMPLAN final demands are measured in terms of producer prices.

MULTIPLIERS

Each industry that produces goods and services generates demands for other goods and services. These other producers, in turn, purchase goods and services. These indirect purchases (indirect effects) continue until “leakage” from the region (imports, wages, profits, etc.) stop the cycle. These iterations are described by multipliers.

Each of these multiplier types can be calculated for output, employment, and income (value added).

Output multipliers are derived by dividing the total (direct, indirect, and induced) output effects by the direct output. An output multiplier provides an indicator of the total output created (direct, indirect and induced) for each dollar of direct output.

Income multipliers (or any of the value added components) are derived by dividing the total (direct, indirect, and induced) income effects by the direct income. An income multiplier provides an indicator of the total income created (direct, indirect and induced) for each dollar of direct income.

Employment multipliers are created in the same manner as the income multiplier, but using employment rather than income. An employment multiplier provides an indicator of the total jobs (direct, indirect and induced) for each direct job.

WYOMING DATA AND ANALYSIS CONVENTIONS

All impact amounts are expressed in 2014 dollars using IMPLAN deflators based on the U.S. Bureau of Labor Statistics’ Consumer Price Index.

Through IMPLAN, direct employment from the RTIM model was used to estimate all of the associated indirect and induced effects. Employment associated with retail trade was evenly divided between general merchandise stores (sic 53) and miscellaneous retail (sic 59). Employment associated with ground transportation was divided between auto rental, gasoline service stations, and local transportation based on the expenditure distribution data used for the RTIM model.

Industry Groups for Secondary Impacts

Accommodation & Food Services

- Food services and drinking places
- Hotels and motels, including casino hotels
- Other accommodations

Arts, Entertainment & Recreation

- Bowling centers
- Fitness and recreational sports centers
- Independent artists, writers, and performers
- Museums, historical sites, zoos, and parks
- Other amusement, gambling, and recreation industries
- Performing arts companies
- Promoters of performing arts and sports and agents for public figures
- Scenic and sightseeing tours and support activities for transportation
- Spectator sports

Wholesale & Retail Trade

- Building material and garden supply stores
- Clothing and clothing accessories stores
- Electronics and appliance stores
- Food and beverage stores
- Furniture and home furnishings stores
- Gasoline stations
- General merchandise stores
- Health and personal care stores
- Miscellaneous store retailers
- Motor vehicle and parts dealers
- Nonstore retailers
- Sporting goods, hobby, book and music stores
- Wholesale trade

Transportation

- Air transportation
- Automotive equipment rental and leasing
- Automotive repair and maintenance, except car washes
- Couriers and messengers
- Rail transportation
- Transit and ground passenger transportation
- Travel arrangement and reservation services
- Truck transportation
- Warehousing and storage
- Water transportation

Professional Services

Accounting and bookkeeping services
Advertising and related services
All other miscellaneous professional and technical services
Architectural and engineering services
Book publishers
Cable networks and program distribution
Child day care services
Civic, social, professional and similar organizations
Colleges, universities, and junior colleges
Computer systems design services
Custom computer programming services
Data processing services
Database, directory, and other publishers
Elementary and secondary schools
Environmental and other technical consulting services
Grantmaking and giving and social advocacy organizations
Home health care services
Hospitals
Information services
Legal services
Management consulting services
Management of companies and enterprises
Motion picture and video industries
Newspaper publishers
Nursing and residential care facilities
Offices of physicians, dentists, and other health practitioners
Other ambulatory health care services
Other computer related services, including facilities management
Other educational services
Periodical publishers
Photographic services
Radio and television broadcasting
Religious organizations
Scientific research and development services
Social assistance, except child day care services
Software publishers
Sound recording industries
Specialized design services
Telecommunications
Veterinary services

Other Services

- Business support services
- Car washes
- Commercial machinery repair and maintenance
- Death care services
- Drycleaning and laundry services
- Electronic equipment repair and maintenance
- Employment services
- Facilities support services
- General and consumer goods rental except video tapes and discs
- Household goods repair and maintenance
- Investigation and security services
- Lessors of nonfinancial intangible assets
- Machinery and equipment rental and leasing
- Office administrative services
- Other personal services
- Other support services
- Personal care services
- Private households
- Services to buildings and dwellings
- Video tape and disc rental
- Waste management and remediation services

Government

- Federal electric utilities
- Federal Military
- Federal Non-Military
- Other Federal Government enterprises
- Other State and local government enterprises
- Postal service
- State & Local Education
- State & Local Non-Education
- State and local government electric utilities
- State and local government passenger transit

Construction

- Commercial and institutional buildings
- Highway, street, bridge, and tunnel construction
- Maintenance and repair of farm and nonfarm residential structures
- Maintenance and repair of highways, streets, bridges, and tunnels
- Maintenance and repair of nonresidential buildings
- Manufacturing and industrial buildings
- New farm housing units and additions and alterations
- New multifamily housing structures, nonfarm
- New residential 1-unit structures, nonfarm
- New residential additions and alterations, nonfarm
- Other maintenance and repair construction
- Other new construction
- Water, sewer, and pipeline construction

Finance, Ins., & Real Estate

Funds, trusts, and other financial vehicles
Insurance agencies, brokerages, and related
Insurance carriers
Monetary authorities and depository credit intermediation
Nondepository credit intermediation and related activities
Real estate
Securities, commodity contracts, investments

Mining & Manufacturing

all mining & manufacturing industries except for food processing

Agriculture & Food Processing

farming & manufacturing industries in food processing
